Fee: \$20. (A portion goes to charity)

858.270.8161 (Noah's Ark) 760.753.1954 (me!)

WHERE?

Snorkeling at Islas Marietas!

Sayulita, Mexico (Just North of Puerto Vallarta) 5.17.07...Snorkeling off the Islas Marietas...J. Cousteau's location for his first National Geographic film.

The beautiful wedding of TJ. and Quincy brought many family members to Sayulita, Mexico. All manner of water fun, hiking, talking etc to be had! A half and hour trip from the beach on Sayulita Bay via Capt. Pablo's snorkeling skiffs brings you through dolphin and manta populated waters to the Islas Marietas...islands that are the home of Blue Footed Boobies, Pelicans, and all sorts of sea tern. Boat in and around natural caves and snorkel into private

Snorkeling cont.

beaches inside the islands via caves and passages. Pacific Bottlenose Dolphins swim and leap from the waters, sea birds race with your boat and mantas leap out of the water greeting you along the way! Fee: 8 people = \$25. per person (2-3hrs) What a bargain! See: www.sayulitalife.com

WHO, HOW AND WHAT?

Tip on Fleas: Margarat Nee: **The Art of Dog** www.theartofdog.com

A few non toxic flea tips: Any soap kills fleas. So there's no need for "flea dip" when bathing your pet; a flea comb, a small dish of soapy water, and five minutes a day will solve a minimal flea problem. Fresh food, including supplements for skin health, will make your pet less attractive to fleas all year 'round.

Interesting new automatic Cat Litter box...check it out!!!:

Litter Robot, <http://www.litter-robot.com> 1-877-250-7729

Customer Service hours:

Mon - Fri: 10:00 AM - 10:00 PM Eastern

This looks quite interesting! This is an automatic self-cleaning litter box that works. Has a 60 day money-back guarantee and an 18-month full warranty. Hey, if your cats are not fully satisfied, for any reason, you just return the product! Can't beat that!

Check out the website at www.litter-robot.com Site has lots of information as well as a video demonstration of how this works.

Light Summer "reading" for you!

Prairie Dog Twang:

Through a variety of birdlike chirping sounds, prairie dogs alert each other to approaching creatures. They demonstrate a surprisingly complex communication system, and even have dialects specific to their particular colony. "It's like hearing different people speak from California, Texas and Vermont," says Constantine Slobodchikoff, a professor of biology at Northern Arizona University in Flagstaff. In his 25 years studying Gunnison's prairie dogs, he's recorded them vocalizing ten nouns including hawk, deer and coyote, a number of adjectives to identify color, size and shape, and even some verbs to indicate speed. Thus a prairie dog might alert its colony by chirping "a tall human in yellow shirt is approaching fast."

But Slobodchikoff suspects that prairie dogs may have an even larger vocabulary. In an ongoing study, he and student researchers built black, wooden silhouettes of animals, as well as geometric shapes -- ovals, triangles and stars -- and flashed them over a prairie dog colony. The reaction? "The prairie dogs manufactured new words to describe the shapes," says Slobodchikoff. "Their brain contains a very extensive vocabulary that they can pull out at will."

Eventually, Slobodchikoff hopes to talk to the animals, although early attempts have made for less than scintillating conversation. "I used my best prairie dog imitation to say coyote, and they just looked at me in disgust," says Slobodchikoff. "It looked like I had said a bad word."
