WHO, HOW AND WHAT?

Autumn equinox is here, time for harvesting crops, dreams and thanks.

Well, I planted pumpkins late and am in hope of having them appear by end of October for harvest...right now on **September 22, 2009 the fall equinox occurs at 2:18pm (PDT)** in the northern hemisphere.

The fall equinox is also called Mabon, Wine Harvest, Feast of Avalon and Winter Finding...all depending on your choice of origin. This is a time for harvest, gratitude and celebration for all we have in hearth, family, friends and abundance. The day is equal to the night; light is equal to the dark on this day. (The perfect Balinese symbol of balance of black and white checker design!) The sun is in the sign of Libra which is a sign that loves perfect balance shown by it's "scales". Did you also know that the equinox is associated with apples which symbolize death, transformation and rebirth (Snow White woke up too!). The name Avalon literally means "land of the apples" and the Celts give this name for the island of the Blessed Dead. So, this autumn celebration has rituals that symbolize a reverence for the nurturing of life via the bounty of crop harvests and also the dreams of the living to be reunited with their dead. Be sure to be very aware of your dreams as well as just how you hold gratitude. The seeds of all sorts of food, hard labor and the seeds of our dreams that were planted during Beltane (spring, May 1) all come true...so we are expressing thanks for our ancestors, spirit guides, etc. for manifesting them. This is a wonderful time to give thanks no matter what...to incubate our dreams of appreciation without holding onto the outcome. Our dreams, our harvests of all good things will keep us warm throughout the winter months of deep sleep and rest. Give thanks!
